PROFESSIONAL SUMMARY

Senior Service Desk Analyst with over 4 years of experience in the Microsoft Azure and M365 ecosystem. Skilled in designing, implementing, and managing cloud-based solutions, including Exchange Online, SharePoint, and Active Directory. Actively applying automation to improve security, scalability, and reliability in cloud environments. Effective in remote collaboration and adept at solving complex technical challenges.

SKILLS

Automation & Scripting
PowerShell | Python | JavaScript | Bash | VBA | SQL | API Integration (REST, JSON, Webhooks) | Git | CI/CD Methodologies

Cloud & System Support
Microsoft Azure (Active Directory, DevOps, Security Center) | Microsoft 365 (Exchange Online, SharePoint, Admin Center, Teams Admin) | AWS | Google Cloud Platform (GCP) | Intune/Endpoint Manager | Google Workspace | Okta | Linux/Windows Server Administration

IT Service Management
ServiceNow (ITSM, ITOM, Workflow Automation) | Job Schedulers | Orchestration Platforms | Confluence

Infrastructure & Networking
VPN | Firewall (SonicWall) | VMware | Windows Server | Meraki | Kaseya | Citrix | LogicMonitor | ManageEngine | TCP/IP | DNS | DHCP

Desktop Application Development
PyQt5 | Tkinter | Multi-Module GUI Applications | Python Packaging

Mobile Development
Kotlin | Android SDK | Jetpack Compose | Room Database | Hilt (Dependency Injection) | Android Keystore (Secure Storage) | Android Studio

Frontend & Web Development
Next.js | Astro | HTML | CSS | JavaScript | Static Site Development | Component Migration

Emerging Technologies (Learning Path)
Microsoft Copilot Studio | ServiceNow Now Assist | ServiceNow Agentic Workflows | Generative AI Fundamentals (ServiceNow University) | AI-Driven Automation | Machine Learning Concepts

Security & Compliance
Identity & Access Management (IAM) | RBAC | Microsoft Defender | Microsoft Purview | SentinelOne | Audit Support | Security Automation | Secrets Management

Methodologies
Agile (Scrum) | Technical Documentation | Continuous Learning

EXPERIENCE

Ricoh Europe | Apr 2025 – Present
Senior Service Desk Analyst (Current Role)

- Delivered onboarding training to new service desk staff, covering internal tools, workflows, and support procedures to accelerate their readiness for live environments.
- Design, implement, and manage cloud-based solutions and hybrid identities using Microsoft Azure Active Directory and Microsoft 365 (Exchange Online, SharePoint).
- Develop and execute PowerShell and Python automation scripts to optimize administrative tasks for Azure and M365, improving operational efficiency.
- Ensure the security and compliance of the cloud environment by implementing policies via Microsoft Defender and managing access through IAM/RBAC.
- Troubleshoot and resolve complex network connectivity issues by analyzing TCP/IP configurations, DNS resolution, and DHCP assignments for remote and on-premises users.
- Generated and analyzed weekly/monthly performance metrics reports using PowerBI, tracking FCR, and ticket volume trends to drive data-informed decisions.
- Developed and maintained knowledge base articles for common issues, reducing repeat incidents by 25% and improving first-call resolution rates.
- Mentored and provided guidance to junior support staff on complex technical issues.

Ricoh Europe | Sep 2025 – Present
Learning Opportunity: Automation Engineering (Concurrent with Current Role)

- Developing proficiency in designing and implementing automated workflows using PowerShell, Python, and JavaScript to enhance service delivery and operational efficiency.
- Building practical knowledge of CI/CD pipelines by collaborating with corporate stakeholders on GitHub and Azure DevOps projects.
- Gaining hands-on experience with the ServiceNow platform to understand workflow triggers and integrations with enterprise tools.
- Strengthening problem-solving skills by conducting root cause analysis on recurring issues and contributing to automation solutions that reduce manual effort.
- Participating in Agile ceremonies to learn backlog management and understand how development aligns with business objectives.
- Creating and maintaining technical documentation for automation scripts and recovery protocols as part of professional development.

Ricoh South Africa | Jun 2021 – Mar 2025
IT Support Analyst

- Supported the onboarding of new colleagues by providing informal training on internal systems, ticketing processes, and support protocols.
- Provided Tier I support to 1,000+ users across major SaaS platforms.
- Managed account access, permissions, and deployments via Active Directory, Azure AD, and Google Workspace.
- Reduced access issues by improving VPN/networking support and documentation.
- Administered Microsoft licensing and endpoint security.
- Contributed to security posture by managing endpoint security tools and enforcing access controls, reducing identity and access-related issues.
- Developed knowledge base articles for common issues.

Ricoh South Africa | May 2018 – May 2021
Human Resources Administrator

- Handled onboarding/offboarding, HR data management, and employee case resolution.
- Coordinated benefits, payroll support, and disability accommodations.
- Monitored HR metrics and reported trends to leadership.
- Delivered core HR admin functions including SuccessFactors updates and audit compliance.

Altron People Solution | Jan 2016 – Apr 2018
Learnership

- Developed a professional foundation in clear written and verbal communication, administrative precision, and customer-oriented support.
- Gained early exposure to workplace procedures, confidentiality, and service delivery in a structured corporate environment.
- Built disciplined work habits and time-management skills through formal training and practical application.

PROFESSIONAL DEVELOPMENT

Infrastructure Automation & Integration Initiative | 2025 – Present

- **Objective:** To proactively reduce manual toil and improve system reliability by building automation competencies.
- **Key Activities & Outputs:**
  - Developed Python and PowerShell scripts to automate system integration tasks and eliminate repetitive IT workflows.
  - Built foundational CI/CD pipeline knowledge using GitHub Actions and Azure DevOps through hands-on lab projects.
  - Gained hands-on experience with Docker to understand containerized workload management and orchestration.
  - Explored ServiceNow ITOM and workflow automation to understand platform integration possibilities.
- **Technologies Used:** Python, PowerShell, GitHub, Azure DevOps.

EDUCATION & CERTIFICATION

ITIL 4 Foundation **|** *Axelos (PeopleCert)*

HDI Support Centre Analyst **|** *Asseco Academy*

Diploma in IT (NQF 6) **|** *Richfield Graduate Institute of Technology* | 2023

National Certificate: Business Analysis Support (NQF 5) **|** *Impactful*

Microsoft Identity and Access Administrator SC-300 | *Currently studying*

ADDITIONAL TRAINING

- *Cybersecurity Fundamentals – IBM SkillsBuild*
- *ServiceNow IT Leadership Professional Certificate – LinkedIn*
- *AWS Educate: Cloud 101 & Intro to Generative AI – AWS*
- *Introduction to Data Science – Cisco*
- *Google IT Support Specialization – Coursera*
- *Now Assist and Agentic Workflow for ITOM Delivery Accreditation - ServiceNow University*
